

A New Generation Safety Scalpel

PenBlade is a self-retracting, safety scalpel designed for the physician.

Utilizing an ergonomic grip and a high-quality scalpel blade,

PenBlade makes precise surgical incisions with minimal

effort. The safety mechanism is activated without

changing the grip, creating a truly safe

solution. PenBlade is safety

solution. PenBlade is safety without compromise.

Premium surgical-grade stainless steel blade

BLADE

PenBlade is the first safety scalpel suitable for use in the operating room.

- General Surgeon

It's perfectly sharp, easy to use, and much safer than a regular scalpel.

Safe, tapered groove for sutures & PICCs

- Pediatric Surgeon

PenBlade Safety Advantages

Feature	Benefit	
Self-Retracting Blade	For maximum safety the blade completely retracts with a push of a button	
One-Handed Activation	The blade is easily deployed with one hand using a pen-like action	
Front Release Button	The safety mechanism can be activated without looking, which allows clinicians to maintain focus on the patient	
Integrated Trimming Groove	Clinicians can use the retracted blade for trimming sutures and PICCS	
Effortless Safety	Minimizes the motion and effort required to operate the device safely	
Rigid and Ergonomic	PenBlade is sturdy and easy to hold	
Audible Click	An audible click indicates that the blade is fully protected and safe without looking
