

**Notice to User:** This list associates products with patents ("properties") and is posted on the Internet to provide notice to the public of the properties listed. There is no charge for accessing this publicly available information. This list is provided in compliance with the virtual patent marking provisions of US 35 USC 287 and to reasonably provide notice of related international patent rights when applicable. To find properties on this list, locate the model number on the corresponding product and search for it on the list. The patent process is dynamic and the content of this list and association between products and properties may change due to events including, but not limited to: filing, publication, issuance, licensing, product changes, expiration, abandonment, and other circumstances. Thus, some model numbers may not be associated with a corresponding property, and such will be corrected as soon as learned of. Also, the content of this list is updated from time to time but may not be up to date at the specific time you visit this link. Patent applications may be pending or published, and patents may have issued in the United States and elsewhere which are not identified on this list. This list may be unavailable from time to time without notice as part of maintenance or an unintended outage. Efforts will be made to maintain this link page active. This list might not be all inclusive and other products not listed here may be associated with one or more properties in the United States or elsewhere. Absence of any property from this list does not prevent enforcing any and all legal rights associated with the property.
